# HOW CAN SMB ECOMMERCE BENEFIT FROM BIG DATA

FOR BIG DATA TO BE MEANINGFUL FOR THE SMALL BUSINESSES, IT NEEDS TO BE TREATED IN SUCH A WAY THAT THE INSIGHTS SHOULD HELP SMBS ACHIEVE THEIR GOALS.

A customised approach to big data analysis is required for helping SMBs with their data related problems as they would not have huge budgets or massive teams to afford million-dollar databases or carry on with year-long big data projects.

A big data strategy for SMBs should be goal oriented, fast and flexible and should be able to return high returns in a short time frame.
