

AI POWERED PERSONALIZATION FOR SMB ECOMMERCE

The hero you've been waiting for so long

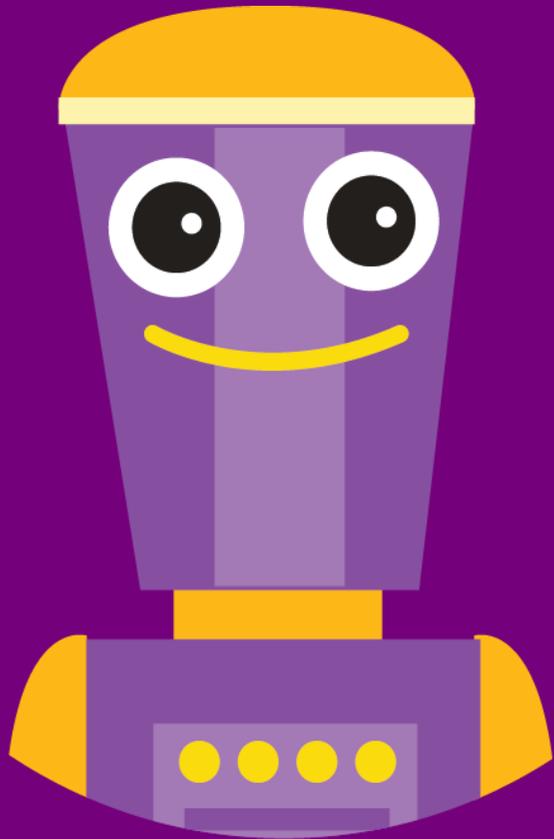

The literature on AI has long been present before the term AI powered personalization was coined.

The early texts on AI dates back to ancient Greek and mentions the extraordinary power of knowledge.

The history of human efforts to gain knowledge then appears in the works of many authors and philosophers including Dante, Milton, Mary Shelley (in Frankenstein) and even Shakespeare.

**In today's popular culture,
artificial intelligence is
being portrayed
both as a monster
and a valuable resource
of innovation
especially by Hollywood
that's been using
AI as a staple for years.**

**In the context of eCommerce,
AI is a sexy term as it refers to
all activities that are helping
online retailers with
dehumanized methods.**

Areas through which AI has been helping eCommerce businesses for years;

- **Dynamic pricing,**
- **AI powered personalization,**
- **Customer service via chatbots**
- **Retargeting,**
- **Stock tracking**
- **Payment tracking**

**Technology has radically
changed the psychology of
today's consumers and
created a host of new
expectations**

**Given the transformation in the eCommerce world,
it has nearly become impossible to make use of the big data in
eCommerce without using AI.**

**Amount of
customer
data**

**Type of
customer
data**

**Demand for
real-time
applications**

AI powered personalization can empower online retailers by answering the critical question on an eCommerce executive's mind.

Which product is my visitor looking for now?

How to welcome a visitor with a new online store each time she stops by?

USE AI POWERED PERSONALIZATION

Pick up on where loyalty programs have failed

Get closer to visitor behaviours in a scalable and practical way

Build loyalty by understanding the visitor's individual needs

How can small and medium sized businesses benefit from personalization?

**SaaS
personalization
engine !!!**

AI powered personalization engine that can;

- Work on a SaaS model
(an engine that works on cloud and offers monthly subscription)
- Support eCommerce platforms
(i.e. Shopify, WooCommerce, OpenCart, PrestaShop)
- Work on any online store regardless of its traffic

0 1 1 0 0
1 0 1 1 0
1 1 1 1 0
