INTRODUCTION

A lot of eCommerce store owners who don’t feel the need to invest on design for their online stores use this argument; “customers don’t care if the online store has the best website design.” And maybe that’s true! Maybe your customers do not think about the design of the site consciously. But, think of all the times when eCommerce businesses have been complaining about abandoned carts and those times when you left an online retail store frustrated because either you didn’t find the right products, or you didn't feel safe disclosing your payment information. When you did that, I bet you thought how badly the website was designed.

Modern eCommerce website design does its job silently, giving every customer a seamless shopping experience. Great eCommerce websites will never make you stop and think – “something is not right.” Thay fulfill customers’ needs every single day. In this eBook we are going to talk about the best eCommerce websites of 2019 based on how some websites have been performing and what the elements in those websites are that make each of them an eCommerce website design inspiration.
CHAPTER 1:

SOME OF THE BEST ECOMMERCE WEBSITE DESIGN INSPIRATIONS

Do you know how you want your customers to feel when they first open your website? Think about it!
One of the recently launched online stores that we can talk about when it comes to this particular aspect is Pinpaper Press. Pinpaper Press is a gift-wrapping website. The reason we love this website is because it manages to come off real simple and even human. Right from the homepage, you get to know what the brand is about, within the first five seconds of landing on the page.
MILK MAKEUP

Milk Makeup stands out in this respect too. This US-based online skincare and makeup store has done a fantastic job of understanding their core demographic and how each customer varies from the other. Unlike other makeup companies, Milk offers some education along with its products (offering looks instead of simply shopping by product) and then complements it with videos on the product page showing how the products work on different skin tones.
The objective behind starting an eCommerce website is always selling. But being able to tell a story about your brand is what makes it stick out. Huckberry is one of our favorite eCommerce stores for their keen ability to narrate its brand story and translate it into an effective Call-To-Action.
ASOS

ASOS is considered an epitome of the best looking eCommerce websites. Featuring pretty much at the top of any top 10 best eCommerce websites, or 50 best eCommerce websites. The company has been doing everything right when it comes to its online presence. Their product images are high resolution and clear. The website loading speeds are great coupled with a smooth web to mobile transition. The website app is uncluttered, intuitive and concise.
